d'images nécessaire. Les diagrammes suivants
illustrent la méthode.**

Ontario Dental Society

Annual Meeting, Dental College

Toronto, May 10-11-12

1915

DEAR DOCTOR :

Progress in the science of dentistry has been so rapid in recent years that each programme committee of this Society has found that the members are becoming more and more interested in the meetings, and particularly in the papers and the standing of the men presenting these papers. It would seem from the programme now assured for the coming meeting that it would be next to impossible to arrange a more practical list of papers, and the men secured to give them are second to none in the various subjects which they will present.

The President's address will doubtless offer still further suggestions for the improvement of the Society and the science of dentistry, and the discussion which will follow will be helpful to all and will bring to light many good ideas.

No subject is of more importance to-day, nor at any time in the history of dentistry, than that of the treatment and preparation of root canals. Your committee has been particularly fortunate in securing without doubt the most popular man upon this subject in America—Dr. J. R. Callahan, of Cincinnati, Ohio—from whom the Executive of Toronto Dental Society tried very hard last fall to get a paper, but were unsuccessful. Dr. Callahan has presented this subject in a great many of the American cities, and in a recent letter to our Secretary he said he had refused invitations from six different Societies since accepting that to appear in Toronto. This paper will be accompanied by about thirty lantern slides, and the essayist says that it could not be given satisfactorily without these slides. No dentist

can afford to miss the opportunity of hearing Dr. Callahan's presentation of this subject.

Amalgam is probably still more used than any other one material to repair lost tooth tissue, and consequently its manipulation and use are of the greatest importance. The largest dental meeting which has ever been held in America, and possibly in the world, was that of the fiftieth anniversary of the Chicago Dental Society, held in that city over a year ago. At that meeting the clinics of the different sections were under the guidance of the very best possible men available, and your Committee feels very jubilant to be able to announce that Dr. Wm. E. Harper, of Chicago, who had charge of the amalgam section at that meeting, will present a paper upon that subject before our Society. Dr. Harper particularly requests that a large number of the members bring along about 50 grains of alloy which they are familiar with, and he will supply forms for each to make one or two fillings. Dr. Harper believes the lesson will be made profitable. There will be no names recorded or published, so that there is no reason to hesitate because of possible results. Dr. Harper's paper and the clinics in connection therewith will be most instructive, as the essayist is an authority upon the subject.

Local Anaesthesia now covers a very broad field in its particular application, especially in the hands of an expert. Dr. Edgar W. Paul, of Toronto, will present a paper upon this subject, accompanied with clinics, in which he will be assisted by a number of the members, giving a demonstration of the possibilities of local anaesthesia for the relief of suffering during the preparation of sensitive cavities, the grinding down of teeth for abutments, root amputation to cure persistent and chronic abscess, removal of pulps, extraction of teeth, etc. Dr. Paul has specialized for many years, and is perhaps better qualified than any man, at least in Canada, to present this subject. This work is of vital importance to the average dentist, particularly those who practice in the smaller centres.

The treatment of the teeth of children is a difficult problem, and your Committee has the promise of

Dr. John A. Bothwell, Toronto, upon his method of handling found in the temporary to nearly exposed and hypertro or removal of roots, and the give to the best interests of happiness. Dr. Bothwell has been in charge of the dental for Sick Children and also of children are treated exclusively hospital clinics, and is high this subject. It is most important teeth be preserved in the time of their replacement b and no dentist does his full c these teeth the attention they

At the Luncheon on Tuesday Metropolitan Assembly Room, Archdeacon Cody will speak. Archdeacon as an entertaining comment.

The clinics will be many repay any man for his attention. An interesting and new feature the presentation in clinic for prosthetic work by several members of the Club,—men who have taken part by Dr. W. E. Cummer. He thoroughly and well everything Cummer has anything to do something good, and there is your being disappointed.

The exhibits this year will be a large infirmary of the College of Dental Surgeons. The finest display of dental goods the Society have ever had the opportunity of one collection. Everything v

It would take too much space to list the good things which have been prepared for pleasure and instruction, and well, it will be your loss and the Committee. A better program has been prepared for any meeting of this

much space here to tell you all
a have been arranged for your
ion, and if you do not come—
loss and not the fault of the
r programme was never pre-
g of this Society.

IMPORTANT—At the meeting of the Society
last year the incoming Programme Committee was
instructed to take some steps to remedy the lack of
interest manifested by the members outside of
Toronto in the production of the programme. This
Committee has formulated a plan to link up in a
practical way the principal local Societies in the
Province with the main Provincial Society. In each
district where there is a local Society, credit will be
given that body in the programme of all members
in that district giving clinics or in any way assisting
in the production of the meeting. Does the ac-
companying list of clinics indicate that your district
is well represented? If not, write Dr. T. W.
Dawson, 2 East Bloor Street, Toronto, Supervisor
of Clinics, and tell him upon what subject you will
give a clinic. The copy of the programme will go
to the printer about Wednesday or Thursday next,
when Dr. Dawson should have knowledge of all
clinics.

It is especially desired that every local Society
appoint a representative to meet the Sub-Committee
in charge of this plan of re-organization during the
meeting. Notice of this meeting will be mailed
to the Secretary of each Society.

Programme

MONDAY, MAY 10th

1.00 p.m.—Meeting of Executive Committee

Registration and Deposit of Railway Certificates.

2.00 p.m.—President's Address.

C. A. SNELL, Essex,

General discussion opened by

C. C. LUMLEY, St. Thomas.

Appointment of Nominating Committee.

Reports of Committees.

4.00 p.m.—Paper : “Principles and Practice of Treating Children's Teeth.”

J. A. BOTHWELL, Toronto.

Discussion opened by

O. S. CLAPPISON, Hamilton.

W. J. PRICE, Orangeville.

8.00 p.m.—Paper : “Root Canal Preparation.”

J. R. CALLAHAN, Cincinnati, Ohio.

Discussion.

TUESDAY, MAY 11th

9.00 a.m.—Paper: “An Improved An al-gam Technic Essential to Density and Adaptation.”

WM. E. HARPER, Chicago, Ill.

Discussion opened by

A. T. MORROW, Maxville.

J. R. PATTON, Dutton.

11.00 a.m.—Paper : “The Possibilities
of Local Anaesthesia.”

E. W. PAUL, Toronto.

Discussion opened by

G. W. EVERETT, Hamilton.

J. W. CLAY, Calgary, Alta.

12.00 Noon—Election of Officers.

12.30 p.m.—Luncheon at Metropolitan
Assembly Rooms, 247 College St.
Speaker—VEN. ARCHDEACON CODY.

2.00 p.m.—Clinics.

WEDNESDAY, MAY 12th

9.00 a.m.—Clinics.

Clinics

TUESDAY, P.M. MAY 11th and
WEDNESDAY, A.M. MAY 12th

WM. E. HARPER, Chicago.

“Amalgams.”

J. R. CALLAHAN, Cincinnati.

MILLER MFG. COMPANY.
I. STERN DENTAL SUPPLY COMPANY.
S. S. WHITE DENTAL MFG. COMPANY.
TEMPLE-PATTISON COMPANY.
A. C. CLARK COMPANY.

Railway Tickets

Purchase first-class one-way ticket to Toronto, at the same time securing "Standard Convention Certificate," stating to the Agent that you are going to attend the Ontario Dental Convention. If you cannot get a certificate at your station, ask the Agent for the nearest point where such a certificate can be obtained, and buy a local ticket to that point, and from there buy a one-way ticket to Toronto, securing Certificate.

Deposit your Certificate and twenty-five cents with clerk at Dental College when registering. These Certificates will be endorsed by the Railways' Representative and returned to the members on Tuesday, the 11th May and Wednesday, 12th May.

If three hundred Certificates are presented there will be no charge for return journey; if less than that number, but over one hundred the fare will be but one-third of the regular rate.

Every one will please secure these Certificates. It saves very little for those living near Toronto, but increases the number of certificates issued and thereby means a considerable saving for those who come greater distances.

The reduced rates will apply from May 6th to May 15th, both days inclusive.
